### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krech, Jr. (6,057,852 hereinafter "Krech").

Krech teaches graphics system (Figs. 1-4) to perform a method for generating a primitive extension defining a generalized primitive (Figs. 5A – 5G and cols. 9 and 10, Table I) comprising parameterizing the generalized primitive with parameters (It is noted that Krech did not particularly use the same terminology for parameters, ie, w, s, and a, but Krech did describe the meanings or functions of these parameters, such as, number of vertices to form originating and adjoining primitives, number of vertices to be added to either an originating primitive or an adjoining primitive to form either an adjoining primitive or additional adjoining primitive, and an anchor width (the one is shared by all triangle), indicates a number of anchor vertices to be used) (see description column in table I); providing an originating primitive (see Figs. 5A-5G, the first primitive on the left most); and generating the primitive extension of the originating primitive responsive to the parameters (see examples in Figs. 5A-5G and Table I). Therefore, at least claim 1 would have been obvious by Krech as set forth above.

Claims 2-15 add implementation details suggested by the generic teachings of Krech as detailed above for claim 1 further in view of the particular teachings of Figs. 5A-5G and Table I, whereby claims 2-15 would have been obvious.

Claims 16-23 appear to use different terminology for means which perform the similar scope or function as claims 1-15, and thus are rejected under similar rationale.

### ***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kee M Tung whose telephone number is 703-305-9660. The examiner can normally be reached on Tuesday - Friday from 5:30 am - 4:00 pm.
